

Source embedding fields

2018 embedding (64-D)

2020 embedding (64-D)

Derived operations (from the 2018 and 2020 fields)

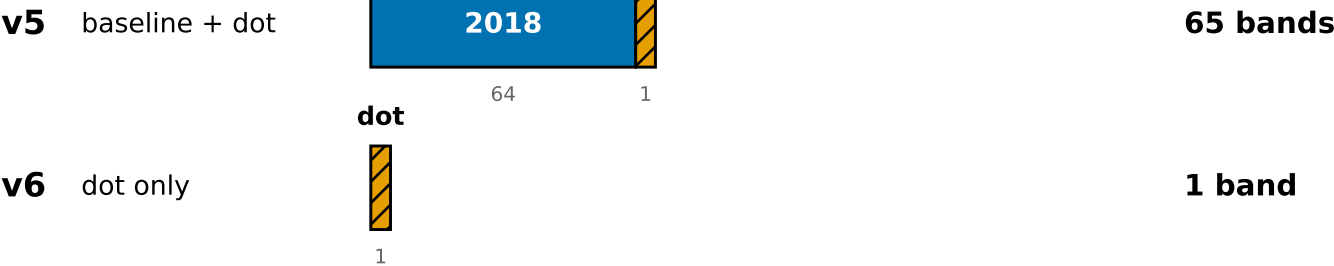

delta = 2018 - 2020, element-wise; a 64-band difference image (64-D)

dot = $\Sigma(2018 \times 2020)$ over 64 dims; cosine similarity, 1-D, range -1 to 1

Feature configurations (classifier input stacks)

 baseline (full embedding field)

 change (delta or dot)
