

Interpreted Reference, Spectral Baseline, and Embedding Configurations (Cell 31320)

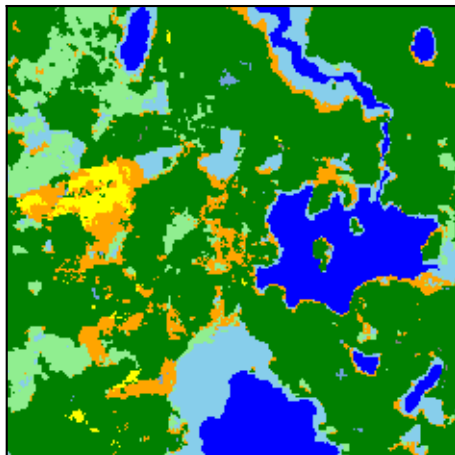

interpreted reference

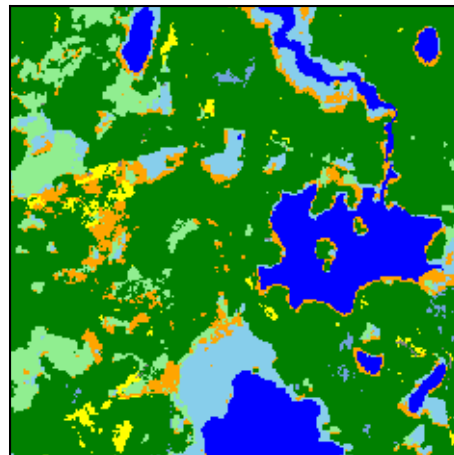

spectral

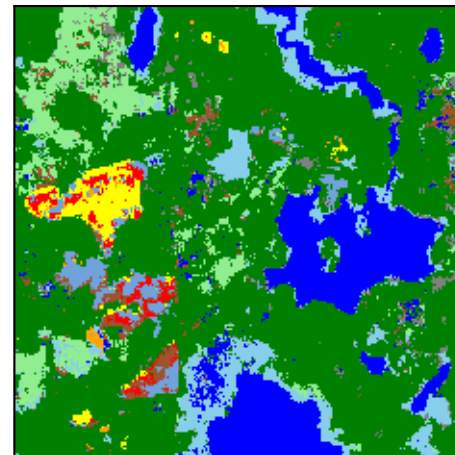

v2

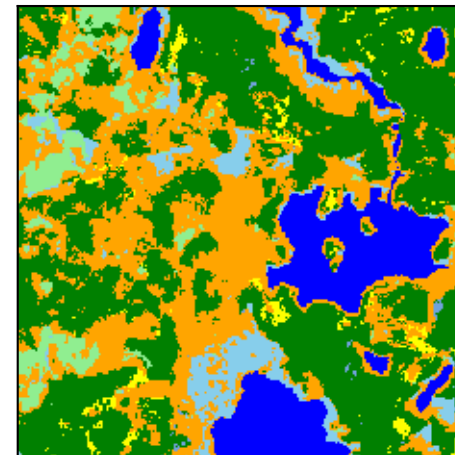

v3

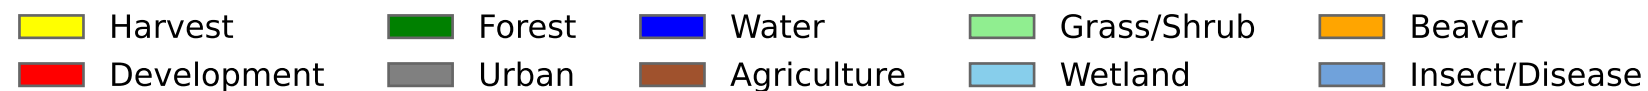

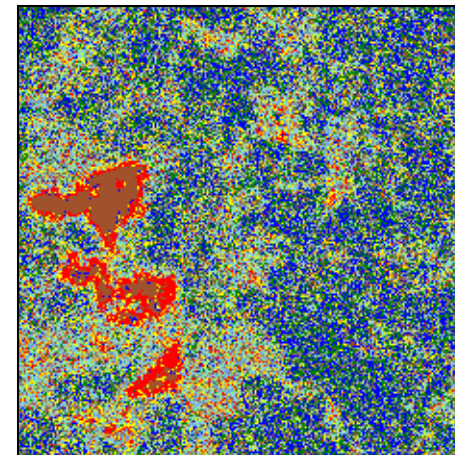

v4

v5

v6

The adjudicated interpreted reference for cell 31320 alongside the spectral baseline (spec_all) and each embedding configuration, v2 through v6, with the standard land-cover class colors. The scale bar is 1 km. Against the reference, the spectral baseline and the baseline-preserving embedding configurations stay spatially coherent, while the dot-product configuration v6 dissolves into speckle.
