
Single-date Tasseled Cap position of the training points, plotting TC wetness (2018) against TC brightness (2018) in a two-by-five grid of small multiples, one panel per class. In each panel the full pooled point cloud is drawn in grey and the panel's own class is overlaid in its color, with change-class labels in bold. The shared axes let you compare panels directly and see where each class sits within the overall cloud.
